

KI 6350 Series Visual Fault Locator General Features

Revision: 3

Simple and Compact

A small, high quality and very low skill fiber cable tester which yields excellent results.

Class 1 Laser

Labelling and eye safety is compliant with IEC60825-2011 Class 1, even with no attached fiber, so it requires no special safety procedures or site signage, and is eye safe if accidentally picked up by a child.

Translucent Captive Dust Cap

Specially designed captive protective dust cap which is translucent enables user to see if the laser is turned on even with the cap is mounted on the instrument.

2x AAA Alkaline Batteries

2x AAA alkaline batteries work for up to 40 hours.

Selectable Pulsed / CW Mode

Continuous or pulsed mode is selectable by just a press of button.

Recessed Operation Button

Prevents unintended eye hazard or flat batteries resulting from accidental button presses

Durable Construction

Ruggedly constructed from metal and rubber, the unit withstands dust and water immersion. The outer rubber sleeve design of the unit provides users with a firm grip and prevents it from rolling off a bench.

2.5 mm Universal Connector

Suitable for 2.5 mm fiber optic connectors, and the built-in ceramic alignment sleeve ensures durable operation.

An optional 1.25 mm adaptor is available.

Pen-style Retaining Clip

Enable users to conveniently carry the unit around by clipping it onto their shirts or pockets just like a normal pen.

Other Features

- 3 Years warranty
- Made in Germany & Australia
